- If required, for larger more complex facilities, add attach pages.
- A brief explanation should be provided where any part of this template is deemed not relevant or applicable to you situation.

#### PERSONAL INFORMATION PROTECTION STATEMENT

Personal information we collect from you for Permit and Identity Card processes will be used by WorkSafe Tasmania for that purpose and may be used for other purposes permitted by the Security-sensitive Dangerous Substances Act 2005 and associated laws. Failure to provide this information may result in your application not being processed or records not being properly maintained. Your personal information may be disclosed to contractors or agents of WorkSafe Tasmania, law enforcement agencies, courts and other public sector bodies or organisations authorised to collect it. This information will be managed in accordance with the Personal Information Protection Act 2004 and may be accessed by you on request to this Department. You may be charged a fee for this service.

# 2. Security Risk Assessment - Sites (if applicable)

| ASSESS RISKS                                   |   | Likelihood |   |  |
|--|---|------------|---|--|
| Storage / Handling Site/s<br>Vulnerability of: | Н | M          | L | Measures to Prevent or Mitigate / Additional Comment |
|  |   |            |   | (See note 1. Attachment A)                           |
| Site/s to unauthorised access                  |   |            |   |  |
|  |   |            |   | (See note 2. Attachment A)                           |
| Site/s to theft                                |   |            |   |  |
|  |   |            |   |  |
|  |   |            |   | (See note 3. Attachment A)                           |
| Site/s to sabotage                             |   |            |   |  |
|  |   |            |   |  |
|  |   |            |   | (See note 7. Attachment A)                           |
| Site/s to unexplained loss                     |   |            |   |  |
|  |   |            |   |  |
| Other security risks particular to this site/s |   |            |   |  |
| Other measures to enhance security             |   |            |   |  |

Important note: Site map and manifest <u>must</u> be attached with this security plan document.

# **Security Risk Assessment - Transport** (if applicable)

| ASSESS RISKS  Transport  Vulnerability of:         | н | Likelihood<br>M | L | Measures to Prevent or Mitigate / Additional Comment |
|--|---|-----------------|---|--|
| Spillage and loss of SSE / SSAN whilst in transit. |   |                 |   |  |
| Risk of theft of SSAN / SSE whilst in transit.     |   |                 |   | (See note 4. Attachment A)                           |
| Risk of theft (hijacking) of these vehicles.       |   |                 |   | (See note 5 & 6. Attachment A)                       |
| Unexplained loss during transport.                 |   |                 |   | (See note 7. Attachment A)                           |
| Unauthorised access to vehicle/s.                  |   |                 |   |  |
| Unauthorised access to Temporary storage.          |   |                 |   |  |
| Other Risks.                                       |   |                 |   |  |

## I. Personnel Management

#### Responsible Workers under an SSDS Permit

SSDS Permit holders must keep a current and accurate list of personnel identified as `Responsible Workers', whose identity and background must be checked if they are to have <u>unsupervised</u> access to SSAN / SSE.

'Responsible Workers', who cease work under a SSDS Permit holder must be notified to WorkSafe Tasmania.

#### Staff recruitment

Any request to nominate a new person as a 'Responsible Worker', must be made submitting a form S03 (Responsible Worker under SSDS Permit) to WorkSafe Tasmania via a Service Tasmania Outlet Shop. S03 forms can be found at the WorkSafe Tasmania website.

## Implementing and Maintaining the Security Plan

Provide details of how the 'security plan' will be implemented and maintained:

| Person nominated to mair   | ntain this 'Secur | ity Plan'                  |     |  |
|--|-------------------|----------------------------|-----|--|
| Name:<br>(Security Manager)  |                   |                            |     |  |
| Contacts:  | Phone             |                            |     |  |
|  | Email             |                            |     |  |
| Issue  |                   | Action / Comment           |     |  |
| Indicate the location of where this security plan and related records will be kept   |                   | Security Plan<br>Location: |     |  |
|  |                   | Related documentation:     |     |  |
| Have 'Standards Operating Procedures' been developed for training and instruction of staff in 'security awareness and procedures'? |                   | ☐ Yes                      | □No |  |
| How will security incidents be reported within the company and investigated?   |                   |                            |     |  |
| How regularly will the security plan be reviewed and updated?  |                   |                            |     |  |

#### 4. STORAGE - SITE SECURITY

Details of your secure storage arrangements for SSAN/SSE.

For each site, provide a plan of your property including where the SSAN / SSE will be stored. Photographs may also be provided.

Plans must include:

- Site address and Property (PID) reference number.
- An indication of true north,
- The distance to the nearest public road, property boundaries,
- Distance to any nearby public or private buildings (include residences),
- Internal road layout, vehicle entry points and
- Distances to fuel storage and other dangerous goods stores.

Note: See Appendix C - page 16 for example of combined site map/manifest

| Details about Ammonium Nitra (Details must be supplied for each storage sit   | etails about Ammonium Nitrate (SSAN) Storage Site etails must be supplied for each storage site) |  |  |  |  |
|---|--|--|--|--|--|
| Volumes of SSAN to be stored:   |  |  |  |  |  |
| Usual quantity held:  |  |  |  |  |  |

| Typical length of journey (kms)   |                                     |                      |                     |  |  |  |  |
| Typical duration  |                                     |                      |                     |  |  |  |  |
| Non-Stop?   | Yes                                 | □ No                 |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
| Details of  | the vehicles you wil                | l be using to transp | ort SSAN/SSE.       |  |  |  |  |
| Vehicle Make  | Type (e.g. ute tray truck, MMU, tar | nker trailer)        | Registration Number |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |
|   |                                     |                      |                     |  |  |  |  |

(Note: Vehicles that convey SSAN in bulk or SSE at risk category 3 quantities require a dangerous goods Bulk Vehicle licence)

## Details of how the transport load will be secured in transit.

Loads must be secured by:

- · Lock and key; or
- Constant surveillance; or
- Substantial tamper-proof seals.

(Ref. AS 4145 Locksets & AS 4255 Security seals)

# Explain your company's contingency plan for vehicle breakdown and other emergency situations:

E.g.:

- Notification protocols
- · Availability of alternative suitable vehicles; and
- Availability of a suitable 'temporary' secure holding location

Details of security and access controls at these secure locations, including: Measures in place to restrict access, guards, gates, fences, security lighting etc.

#### 6. Procedures

Controlling access to the secure site/store/vehicle.

Describe the procedures for controlling the access of unauthorised people to site, stores, vehicles or consignments of SSAN/SSE.

This might include:

- · measures in place to restrict access;
- procedures for dealing with unauthorised access; and

If you control access with a pass system, provide details of the security of the pass system including:

- the record keeping and auditing system in relation to passes;
- procedures for forgotten or lost passes; and
- procedures for revoking passes and retrieving passes no longer used or necessary.

#### **Record keeping and inventory procedures**

# Describe the system to be implemented to maintain records of purchases/acquisitions and sales/supply of SSAN/SSE.

These records must include:

- The SSDS Permit & Identity Card details of those supplying you with SSAN/SSE;
- The SSDS Permit & Identity Card details of those receiving SSAN/SSE from you;
- Recording quantities of SSAN/SSE into and out of your possession;
- Recording quantities used in regular activities including: blasting records, disposal and use;
- The procedures for reporting and following up any unexplained losses;
- How consignments are delivered to, and transported away from the site (mode and security); and
- · Regular stock-taking to verify quantities;
- Permit holder must keep the records referred to above in good condition for at least five (5) years, or for minimum period required in other relevant codes/Australian standards.

#### Describe the procedures for investigating and reporting security incidents

(Such as thefts, attempted thefts, sabotage or attempted sabotage, break-ins, attempted break-ins, unexplained losses or any other security incidents).

## 7. Security incidents and Contacts list

#### Security incidents <u>must</u> be reported to the local police and the regulatory authority:

#### CONTACTS LIST

| Local Police         | Contact name    |                                  |
|----------------------|-----------------|----------------------------------|
|                      | Address         |                                  |
|                      | Phone           |                                  |
|                      | 24 hr phone no  |                                  |
|                      | Fax             |                                  |
|                      | Email           |                                  |
| Regulatory Authority | Contact name:   | Worksafe Tasmania                |
|                      |                 | PO Box 56<br>Rosny Park TAS 7018 |
|                      | 24 hr phone no: | 1300 366 322                     |
|                      | Fax:            | (03) 6233 8338                   |
|                      | Email           | wstinfo@justice.tas.gov.au       |

#### 8. Definitions

**'Unsupervised Access'** means: access to SSAN / SSE when no other person with authorised access is present or has control over the SSAN / SSE.

#### **SSDS** means:

SSE: (Security-sensitive explosives) and/or SSAN: (Security-sensitive ammonium nitrate)

#### **Guidance Notes for Risk Assessments**

## Attachment A

# I.Describe measures currently in place at this site to prevent or detect <u>unauthorised access</u> to the site or the theft of **SSAN** from the site:

Current measures might include:

- · perimeter fencing;
- access controls;
- guarding;
- · alarm systems;
- 24 hours operation etc.

#### 2. Assess the vulnerability of this site to the theft of SSAN.

This is an important part of the security risk assessment. You should describe:

- how theft could occur (including the risk of theft by workers and outsiders);
- the likelihood of each scenario happening;
- the extent to which your current security measures are adequate (are there any gaps in physical security, personnel management, procedures or record keeping); and
- what else could be done to reduce the risk of theft of SSAN

#### 3. Assess the vulnerability of this site to sabotage addressing issues such as:

- how access could be gained;
- likelihood of sabotage;
- the consequences of such an event;
- the extent to which your current systems/procedures protects against such events; and
- what else needs to be done?

#### 4. Assess the vulnerability of your company to the risk of theft of SSAN whilst in transit.

This may include addressing the risk of theft from:

- drivers;
- other workers;
- · outsiders during breaks in the journey.

#### 5. Describe current procedures for monitoring the location of vehicles and the well-being of drivers.

This might include:

- route planning;
- duress alarms; and communications systems such as GPS, satellite or mobile phones.

#### 6. Assess the vulnerability of your company's vehicles to the risk of theft (hijacking) of these vehicles.

This will require assessing the ease or difficulty of an unauthorised person gaining access to the driver's cabin at any time during the journey. Consideration should be given to:

- training of drivers;
- · physical security;
- procedures, especially during stops when the vehicle is left unattended; and
- emergency communications.

#### Assess the vulnerability of your company to the risk of <u>unexplained losses</u> of SSAN.

You may wish to consider:

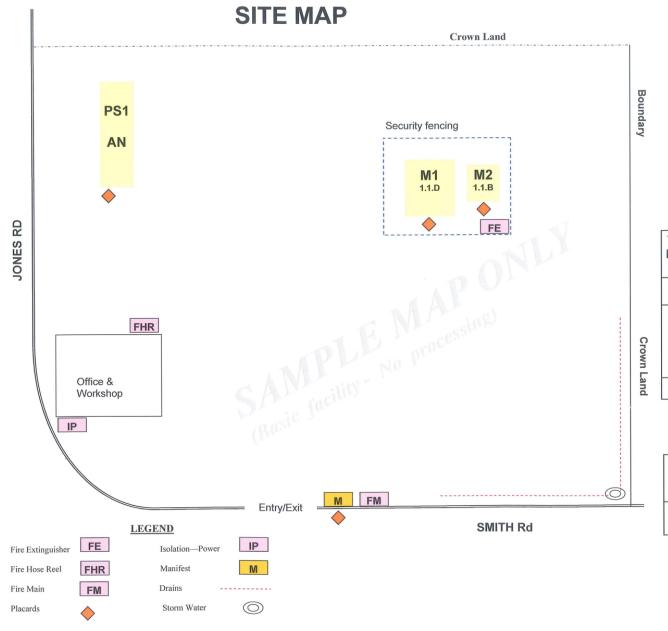

- whether your company has in the past encountered unexplained loss of SSAN;
- if so, the circumstances surrounding this; how might losses occur; the likelihood of this happening; and what procedures or precautions might reduce this risk.
